HENLY JADE CASAYAS

EXPERIENCE

FULLSTACK WEB DEVELOPER

FLYR/NEWSHORE/STARTECHUP INC.

August 2020 – January 2025

Maintained and implemented new features for an international airline booking system. Below are the technologies used to deliver new features and bug fixes in a sprint:

- Angular and Umbraco as CMS for frontend development
- .Net Framework 4.8 and .Net Core for REST API and third-party integration
- Azure DevOps as a deployment pipeline
- Jira as a task management platform
- Git and Azure Repos for repository management
- Slack, Skype and Teams for communication
- Slack for pipeline notification integration

JUNIOR SOFTWARE ENGINEER

VANANAZ SYSTEM INC.

May 2019 – August 2020

Developed language learning applications from Japanese to English and vice versa. The mobile applications are developed for IOS and Android with admin dashboards to manage content and landing pages for marketing. We used the technologies below to deliver the applications in a specified length of time based on a contract:

- React Native for IOS and Android application development
- React and Next.js for admin dashboards and landing pages
- Firebase technologies for hosting and database management
- Bit Bucket for repository management
- Slack for communication and bit bucket pipeline integration

MINDANAO STATE UNIVERSITY ILIGAN INSTITUTE OF TECHNOLOGY

BACHELOR OF SCIENCE IN ELECTRICAL ENGINEERING

2008 - 2016
